

Pedestrian Barrier

Asset protection starts with your people.

Your most important barrier is the one separating your workforce from the four-ton forklift careening across your warehouse floor. Our fully modular system keeps your people safe and your business protected—with the most advanced protective system ever designed.

Energy Absorbing Impacts are directed along the rails & into the concrete

Complete Protection Post and rail system protects the entire area

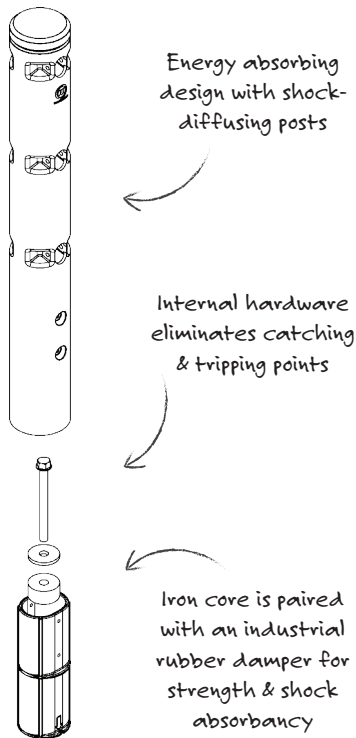

Modular Design Accommodates any space, regardless of size

Pedestrian Barrier

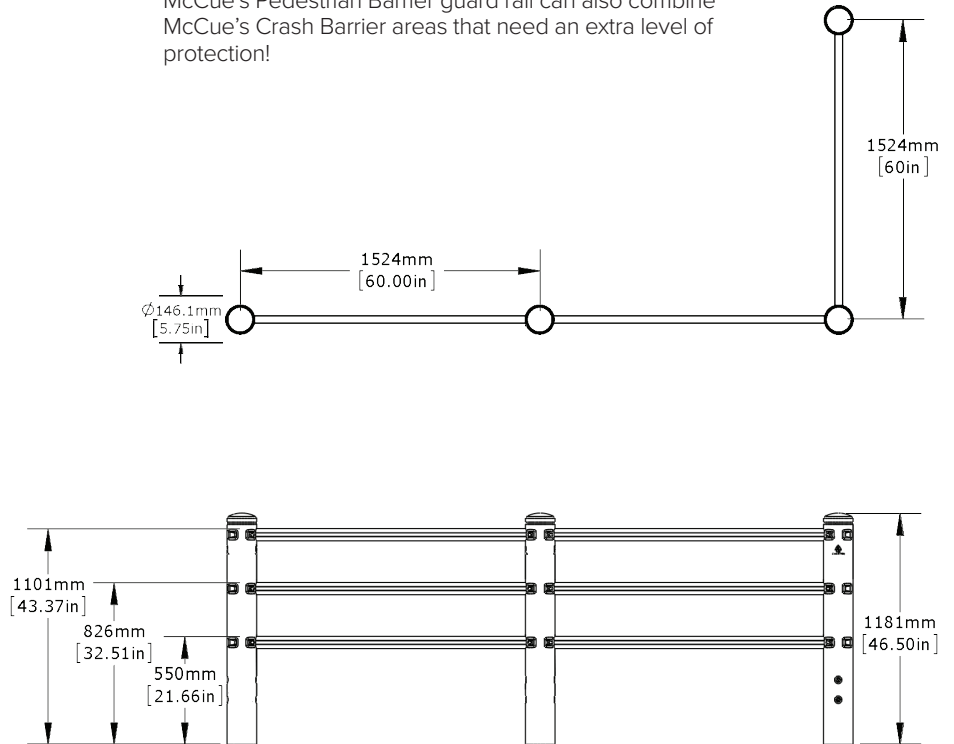

How it works:

Dimensions:

McCue's Pedestrian Barrier guard rail can also combine McCue's Crash Barrier areas that need an extra level of protection!

Pedestrian Barrier Mid Post

17AK601
